OVERVIEW: WHY 'GERIATRIC HOME VISITS' FOR VIKSIT BHARAT 2047?

India is currently undergoing an unprecedented demographic transition. By 2050, the proportion of elderly citizens in India will exceed 20% of the total population, numbering over 340 million individuals. Achieving the national developmental aspiration of Viksit Bharat 2047 is fundamentally contingent

The National Programme for Health Care of the Elderly (NPHCE) emphasizes primary, community-based, and home-based geriatric healthcare.

Geriatric home visits conducted by Community Medicine residents, Medical Officers, and Frontline Health Workers (ASHAs/ANMs) represent the true frontier of public health

This photography contest seeks to document this intimate, critical interface of care, resilience, and clinical compassion.
